SUMMARY

Full-stack software engineer since 2017 and founder of DW Corp, building **AI-enabled products end to end** — LLM agents, RAG pipelines, and machine learning — on a strong Python, C#/.NET, and Node.js backend. I ship features to real customers, build **reusable product foundations** (auth, payments, CI/CD, cloud & on-premise), hire and mentor engineers, and lead Brasília's first **Software Craftsmanship** community. I own the full path from data and retrieval to backend and web interfaces, with deep experience in operational and logistics software.

EXPERIENCE

Founder & AI Engineer

DW Corp

📅 Sep 2022 - Present 📍 Brasília - Brazil

- Built **LangChain/LangGraph agents** (a WhatsApp budget assistant and an event-driven multi-agent bus) behind a common multi-provider LLM interface.
- Built **Curupira**, a reusable Rust/OIDC auth platform (multi-tenancy, SSO, MFA), plus payment integrations, CI/CD, and a bare-metal + hybrid-cloud stack (Terraform, Grafana).
- Hired and mentored 10+ engineers, and lead Brasília's first Software Craftsmanship community.

Senior Software Engineer

Epicor

📅 Nov 2023 - Mar 2025 📍 Austin, TX - USA

- Integrated **Azure OpenAI** and a **RAG pipeline** over proprietary data; built **.NET Aspire** microservices with RabbitMQ on Kubernetes; led an Angular refactor into microfrontends.

Researcher

Ibict / MCTI (federal government)

📅 Mar 2025 - Present 📍 Brasília - Brazil

- Built **Snowflake** data pipelines over institutional data; co-advised a RAG thesis for the judiciary (9.0/10); audited a 600K+-user platform (ISO/IEC 25000, LGPD).

Senior Full-Stack Consultant

SubSurface Dynamics

📅 Jan 2024 - Jun 2024 📍 Alberta - Canada

- Refactored a MERN app into **TypeScript** on Fastify, **Socket.io** and **Redis** (thousands of users); tuned MongoDB Atlas time-series; secured with Auth0/ADAL; built a **Three.js** 3D visualization.

Data & DevOps Engineer

Dado Global

📅 Dec 2021 - Apr 2023 📍 Porto - Portugal

SKILLS

Python FastAPI Django
C#/.NET Node.js Rust
React Next.js Vue/Nuxt
Angular TypeScript
PostgreSQL SQLAlchemy
MongoDB Redis
Snowflake RabbitMQ
Docker Kubernetes
Terraform AWS GCP
Azure

AI & ML

LLM APIs RAG
Embeddings
LangChain/LangGraph
FAISS TensorFlow
Reinforcement Learning

EDUCATION

B.Sc. Software Engineering

Univ. of Brasília • 2015–2017

B.Sc. Computer Science

UDF • 2022–2025

MBA — Supply Chain & Logistics

Southern Cross • 2024–2025

MBA — Database Administration

Anhanguera • 2024–2025

- Designed a Python **ETL** system (SQLAlchemy, pytest) and moved delivery to Continuous Delivery on GitHub Actions, improving SLA from 70% to 95%.

Software Engineer

ClearSale

📅 Nov 2021 - Mar 2022

📍 Miami - FL

- Built high-performance anti-fraud microservices (**C#/.NET**, Dapper) with database views, triggers and stored procedures; defined UML/BPMN processes and mentored the team.

Technical Lead & Researcher

LabTech, UDF

📅 Jan 2023 - Dec 2023

📍 Brasília - Brazil

- Led a multi-tier event-management platform (React, Python, Spring Boot, RabbitMQ, Kubernetes) and mentored junior engineers.

Software Engineer

Layers Education

📅 Mar 2022 - Sep 2022

📍 São Caetano - SP

- Maintained backend and microfrontend systems; cut MongoDB query times from 1.3s to 0.6s, built a BigQuery data lake, and hardened security to OWASP.

Full-Stack Engineer

Compuetra

📅 Jul 2020 - Aug 2021

📍 Porto Alegre - RS

- Built **transport, delivery and yard-management** logistics software with fleet and **vehicle-inspection** systems, and an ERP desktop platform (Electron) on PostgreSQL with a PCI-compliant checkout.

Full-Stack Developer & BPM

ConsultMídia / Bank of Brasília

📅 Apr 2020 - Jan 2021

📍 Brasília - DF

- Built AngularJS/Spring Boot interfaces and REST APIs on **Camunda** BPM to modernize the bank's workflows; integrated Alfresco and automated performance tests (JMeter, Selenium).

Full-Stack & Mobile Developer

Transoft

📅 Feb 2021 - Oct 2021

📍 Brasília - DF

- Built and revamped applications managing sensors and cameras for bus fleets, and a mobile staff-management app (Angular, Ionic, Laravel).

Platform Developer

Ministry of Health / USP

📅 Jun 2019 - Jul 2020

📍 Brasília - DF

- Helped manage **medicine distribution across 5,000+ municipalities**; built the frontend and integrated REST APIs and microservices to surface data and reduce fraud.

EARLIER EXPERIENCE

LANGUAGES

Portuguese

English (C2)

Spanish

TALKS & CERTS

Campus Party Brazil — main-stage talks on Clean Architecture, TDD, AI, SDET & Software Craftsmanship.

Certifications: Power BI •

Scrum (SFC) • Kanban • English B2 (UnB).

- **Taurus Software** — IoT energy-management, hybrid mobile (Ionic) and lead-capture apps (2018–2020). **Gama Cidadão** — Web & Digital Marketing Manager (2017–2018). **UMESB** — student-registration system (2017). **IT Universe** — instructor (2017).
